About Philomath Networks

At Philomath Networks Pvt. Ltd., we specialize in organizing transformative events for schools, organizations, and communities, fostering a culture of exploration, innovation, and growth. From expert-led workshops to competitive events, we create immersive learning experiences that inspire and empower individuals to go beyond boundaries. Partner with us to bring impactful learning to your community!

Partner With Us

Collaborate with Philomath Networks to bring innovation, engagement, and excellence to your institution or organization. Let's work together to create an ecosystem of lifelong learning and impactful experiences!

What Sets Us Apart?

Comprehensive Learning Approach – We blend academic, non-academic, and skill-based experiences through workshops, competitions, expert-led sessions, and immersive programs tailored to real-world applications.

End-to-End Event Management – From conceptualization to execution, we ensure seamless organization of competitions, tech fairs, hackathons, leadership programs, and customized training sessions that align with institutional goals.

Industry & Academic Bridging – We foster collaborations between institutions, corporates, and experts, ensuring that participants gain practical exposure, networking opportunities, and insights into emerging trends beyond traditional education.

Customizable & Scalable Programs – Whether it's a school-level science fest, university hackathon, corporate leadership training, or specialized certification courses, we tailor our events to meet the unique needs of every institution.

Proven Impact & Engagement – Our interactive approach ensures higher participation, deeper learning retention, and enhanced skill development, making every event a transformative experience.

Course

Overview

Course Objective

Master the art of data visualization and analytics with our 5-day hands-on workshop on Power BI. Designed for beginners and aspiring data professionals, this immersive training covers data modeling, dashboard creation, DAX functions, and real-time data analysis. Through interactive sessions and live projects, participants will learn to transform raw data into meaningful insights, build dynamic reports, and make data-driven decisions with confidence. Join us to unlock the true potential of Power BI and take your analytical skills to the next level!

Course Outcome

✓ Master Power BI Essentials

✓ Create Interactive Dashboards

✓ Enhance Analytical Skills

✓ Automate Data Processing

✓ Make Data-Driven Decisions

✓ Work on Live Projects

Training

Modules

Hands-On Learning for Career Growth

Our structured training modules provide hands-on learning, expert guidance, and real-world applications across various domains. Through interactive sessions and industry-relevant case studies, participants gain practical skills and problem-solving expertise.

Designed for students, professionals, and organizations, our tailored programs equip learners with industry-ready skills for career growth. With expert instructors and immersive training, we help you excel in your field. Take the next step in your learning journey today!

Module 1: Introduction to Power BI

- What is Power BI? – Components & Ecosystem (Power BI Desktop, Service, Mobile)
- Overview of Microsoft Power BI Certification (PL-300) – Exam format, weightage, key topics
- Installing & Setting Up Power BI Desktop
- Understanding Power BI Workflow – Connect, Transform, Model, Visualize, Publish
- Exploring Power BI Interface & Navigation

Module 2: Data Preparation & Transformation

- Connecting to Various Data Sources – Excel, SQL, Web, APIs, SharePoint, Cloud Sources
- Using Power Query for Data Transformation
- Data Cleaning Techniques – Removing Duplicates, Handling Null Values, Changing Data Types
- Splitting & Merging Columns, Unpivoting Data
- Appending & Merging Queries for Data Consolidation
- Creating & Managing Data Relationships

Module 3: Data Modelling & DAX

- Introduction to Data Modelling Concepts – Star vs. Snowflake Schema
- Creating & Managing Relationships Between Tables
- Introduction to DAX – Syntax, Measures vs. Calculated Columns
- Basic DAX Functions – SUM, AVERAGE, COUNT, DISTINCTCOUNT
- Logical & Conditional DAX Functions – IF, SWITCH, RELATED, HASONEVALUE
- Filtering Functions – FILTER, ALL, ALLEXCEPT, CALCULATE
- Time Intelligence Functions – YTD, QTD, SAMEPERIODLASTYEAR, PARALLELPERIOD
- Performance Optimization with DAX & Best Practices

Training Modules

Practical Learning for Professional Success

Our comprehensive training modules offer hands-on experience, expert mentorship, and real-world applications across multiple fields. Engaging sessions and industry-based case studies help participants develop practical skills and enhance problem-solving abilities.

Tailored for students, professionals, and organizations, our programs focus on building industry-ready expertise for career advancement. With experienced instructors and immersive training, we empower learners to excel. Take the next step in your professional growth today!

Module 4: Data Visualization & Reporting

- Choosing the Right Visuals for Your Data – Bar, Line, Pie, Maps, KPI Cards
- Creating Interactive Reports – Slicers, Filters, Drill-Through
- Using Custom & AI-Powered Visuals (Key Influencers, Decomposition Tree)
- Conditional Formatting, Tooltips & Bookmarks for Enhanced Interactivity
- Report Layout & Design Best Practices

Module 5: Advanced Power BI Features

- Publishing & Sharing Reports on Power BI Service
- Configuring Data Refresh & Scheduled Refresh Settings
- Managing Row-Level Security (RLS) for User-Based Access
- Introduction to Power BI Embedded & Power BI Mobile
- Integrating Power BI with Other Tools – Excel, Power Automate, Azure

Module 6: Exam Strategy & Hands-On Practice

- Understanding the Exam Format & Question Types (Multiple Choice, Drag & Drop, Case Studies)
- Solving Real-World Case Studies & Scenario-Based Questions
- Mock Exams & Exam Simulations
- Time Management & Exam Tips – How to approach complex questions efficiently

Training Schedule & Format

The Power BI & Business Intelligence Workshop offers a comprehensive learning experience through six interactive modules over six days/weeks. It combines theory with hands-on practice, covering data modeling, report creation, visualization, and dashboard development. Participants will work with real datasets, apply best practices, and analyze case studies to gain practical business intelligence skills and make data-driven decisions.

Day	Module	Focus Area	Duration
Day 1	Introduction to Power BI & Exam Overview	Basics & Exam Overview	5hrs
Day 2	Data Preparation & Transformation	Data Cleaning	5hrs
Day 3	Data Modelling & DAX (Data Analysis Expressions)	Formulas & Relationships	5hrs
Day 4	Advanced Power BI Features	Visualization & Reports	5hrs
Day 5	Exam Strategy & Hands-On Practice	Practice & Strategy	5hrs

The workshop combines live demonstrations, guided projects, and collaborative activities to enhance learning and retention. Participants will tackle industry-relevant challenges, simulating real-world Power BI applications. The interactive format fosters discussions, troubleshooting, and peer learning. By the end, attendees will gain a strong foundation in Power BI, enabling them to create impactful reports and dashboards. Whether professionals enhancing their analytics skills or beginners entering business intelligence, this workshop equips them with essential tools for success in a data-driven world.

How to Get Involved

Steps to Enroll in Training Programs

- Contact us via email or phone.
- Share your preferred course, schedule, and any specific requirements.
- Our team will review your request and confirm the booking.
- You will receive confirmation details via email or call .
